### *Notes Section*

- Change to the Notes section functionality where notes entered into new instances of data will not overwrite general notes; increase in the Notes character limit

### *Reports/Extracts*

- Included ability to filter extract by Referral Date if desired, as well as changed Data Extract internal processing from semi-colon to tab in order to reduce data transformation issues

### *Program Page*

- New section that allows sites to input the number of staff that have attended team meetings, similarly set up to adding instances like incentives/sanctions
- Will be expanded upon further in the pretrial work to become more than just a place for the performance measure tracker (will hopefully include info on CORE user statuses, places to input program staff, etc.)
