Read more what stakeholders are saying about the EBDM Initiative:

*EBDM centers on the idea of continuous improvement and is fundamentally focused on two processes: Learning and Innovation. We seek to learn about our criminal justice system, our processes and the people that exist within it, and we gather together as partners within that system to educate ourselves on evidence-based programs aimed at improving both system efficiency and the outcomes for the people that make their way through it. Innovation occurs when we adapt our practices in light of what we have learned. This process is an incremental one, but because of EBDM we are now having open and honest discussions about the challenges we face as a community and we have the tools to develop strategies to move forward. It is now our responsibility to put those strategies to work for the people of Marathon County.*
